INSTRUCTIONS

Little Billy Goat is the next generation of chalk style restoration paint. It is fresh, fun, easy and environmentally friendly. Little Billy Goat Paint is a water based paint that contains low VOC. Our paint is a one step restoration paint that thoroughly covers up old varnishes, scratches and blemishes while restoring a vintage surface to a rich matte antique look.

Little Billy Goat Paint & Antiquing Glaze can be used on any surface to restore furniture, cabinetry, walls, trim and home decor items. No sanding, stripping or priming is required. Our paint is a self-leveling paint which is enhanced further when used with a water spray bottle for a finish without streaking. For best results apply with a Little Billy Goat Brush

How it Works: The first step is starting with a clean surface, clean your surface with a wet cloth to remove any dust or dirt. Stir paint well before you start painting. For best results and one coat coverage apply generously. Use a spray bottle with water and lightly spray the surface of your piece to allow your paint to easily move across the surface and create a smoother finish. Apply a second coat if needed to cover any spots that are not covered thoroughly. It is best to let your piece completely dry before distressing, sealing and/or antiquing. Depending on temperature and humidity, drying times will vary

There are several different types of distressing with little Billy Goat Paint. One technique is wet distressing. Before you seal simply take a wet rag and rub away any paint from the edges or areas you want a distressed finish, Its that easy! You can also achieve a distressed finish by using Little Billy Goat Antiquing Glazes. Lightly brush the glaze to the areas and/or edges you would like the distressed finish. Apply a final coat of Little Billy Goat Matte Sealer over the entire piece after you achieve your final look.

Apply Little Billy Goat Paint only at temperatures above 45 degrees. Clean tools with soap and water immediately after use.

INSTRUCTIONS

Little Billy Goat "Goat Sticks" will change the way you think about painting. Goat Sticks are the industry's easiest way for adding highlights, emphasizing details or adding a farmhouse antiqued rustic look to any of your DIY projects.

How it Works: Take the protective skin off the tip of the stick and simply apply to your project piece. Blend until you achieve your desired look. Goat Sticks are self sealing within twenty-four hours with no additional steps required.
